

Turkish Angora

This **beautiful** breed has a **slender** body, a long neck, and a wedge-shaped head. The Turkish Angora is playful and devoted!

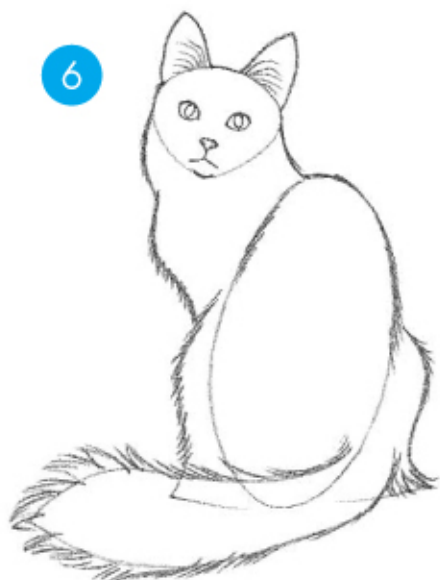

fun fact

The Turkish Angora is one of the national treasures of its homeland, Turkey. It was the first long-haired cat to be brought to Europe; and, in the 1700s, it was the darling of European aristocracy. But the breed lost popularity, and these cats would be extinct today if not for the Turkish zoos that saved them!
