Step 4: Predicting the Answers to Questions Asked of Characters

Bloom's Taxonomy Level: Analysis

Predict how the protagonist and the antagonist would answer the questions in the chart below. In the column labeled "Name," write the answer to the question from the point of view of that character. In the column labeled "Reason," write in the reason you think the character would answer the question in this way. Use your text to provide proof for your responses.

Protagonist: A character sometimes described as the "lead character," "main character," or "hero" in a story.

Antagonist: A character who struggles, battles, or competes against the main character or hero in a story.

Step 5: Recipes

Bloom's Taxonomy Level: Synthesis

Design two recipes to accompany your book. You may choose to create a recipe for a food mentioned in your book or come up with a recipe that centers on a theme in your book. For each recipe, you must include the title of your recipe, a list of ingredients, and directions to create your recipe. You should also include the number of servings for each recipe.
